EDUCATION	Gebze Technical University 2022–present Computer Engineering (100% English) AGNO: 3.1	
EXPERIENCE	Deka Technology Aug 2025 Data & Software Intern - Managed SQL databases (data cleaning, indexing, optimization) and built data pipelines via web scraping for LLM training datasets. Integrated backend SQL databases into a web application, designing the schema and implementing secure API endpoints. - Participated in Agile/Scrum workflows (daily stand-ups, sprints) and managed project tracking using Jira.	
PROJECTS	- Sprinkle – Map–Based Environmental Volunteering App: Developed a React Native mobile app from scratch, integrating a backend API and interactive Leaflet maps to track tree–watering activities. Managed UI, state, and full API communication for a production–ready experience. - Terminal–Based VisiCalc Clone: Built a C++ spreadsheet application using modern OOP principles. Implemented a custom formula parser, cell addressing, CSV persistence, and a custom terminal UI for efficient editing. - Dark Factory – IoT Predictive Maintenance System: Deployed a Python/FastAPI service on a Raspberry Pi. Integrated a local LLM (Qwen 2.5, Ollama) to analyze real–time sensor telemetry and generate structured maintenance reports. - WELLDONE (EU Transnational Project): Contributing to an international project that embeds wheelchair skills training into university curricula. Combining software development and project coordination to promote inclusive mobility practices, knowledge exchange, and digital dissemination across Europe. - Open Source Contributions: Localized the "30 Days of Python" repository into Turkish and regularly contribute to open–source code quality, bug fixes, and documentation.	
SKILLS	Frontend & Mobile - React Native, TypeScript Backend & APIs - RESTful API Design, Python, WebSockets Databases - PostgreSQL, MS SQL, Prisma ORM - Data Handling: Pandas, NumPy, BeautifulSoup Languages - English (Upper Intermediate) - German (Pre–Intermediate) Programming Languages & Paradigms - C, C++, Java, Python - Object–Oriented & Functional Programming AI / Emerging Tech - LLM Integration (Ollama, Prompt Engineering) Systems & DevOps - Git, GitHub, Docker, GitHub Actions - Postman, Jira, Slack Soft Skills - Continuous Learning - Teamwork - Problem Solving
